

In particular, trap door 102 of Fig. 3 is attached to the spittoon by a hinge 104. Trap door 112 of the spittoon of Fig. 4 is pivotally attached. Neither spittoon is configured to retain waste ink when tilted. Similarly, sliding trap door 122 of the spittoon of Fig. 5 rides in a pair of slots in the walls of spittoon 80, while sliding trap door 142 of the spittoon of Fig. 6 rides in a pair of curved slots in the walls of spittoon 80. In neither case does the spittoon include an inwardly extending lip at the top
